Tartu, Estonia

TECHNICAL SKILLS

- **Programming:**
  - Java, Python, C#, SQL
- **Web:**
  - HTML, CSS, JavaScript
- **Tools:**
  - Git, VS Code, IntelliJ

LANGUAGES

- Estonian – Native
- English – C1
- Russian – B1
- Spanish - A1

EDUCATION

University of Tartu
Computer Science | 2024 - Present | Bachelor's degree

Tartu Jaan Poska Gymnasium
2021 - 2024

PROJECTS

DinoCave – 2D Game (C#, Team Project)
- Built a 2D game in C# as part of a university project
- Worked mainly on the core game logic and how the player interacts with the world
- Made sure the game still behaves correctly when the player does something unexpected
- Improved difficulty and flow after watching real users test it at Delta Expo
- Fixed small logic issues that didn't break the game, but made it feel "off"

Blackjack Game (Java, JavaFX)
- Built a desktop Blackjack game using Java and JavaFX
- Designed the program structure using object-oriented principles
- Wrote the game rules and card logic
- Spent time debugging situations where the program ran but gave the wrong result

Point of Sale System (Java, JavaFX)
- Developed a simple point-of-sale system in Java
- Structured the system to handle product selection, transactions, and total calculations
- Focused on clean program flow and logical separation of components

Data Analysis Project – Youth Unemployment (Python)
- Analysed youth unemployment data using Python
- Cleaned CSV datasets (handled missing values and duplicates)
- Identified trends across years and regions
- Created visualisations and presented findings publicly at Delta Expo

React Native Anniversary App (Personal project)
- Built a small React Native app as a personal project
- Tested animations and adjusted layouts on different screen sizes
- Improved small UI details that changed how the app felt to use

WORK EXPERIENCE

LXT AI – Artificial Intelligence Evaluator
June 2023 – May 2024

- Reviewed AI-generated answers and checked if they were logically correct
- Compared different outputs and selected the most accurate one
- Noticed how small changes in prompts could completely change the result
- Learned to look closely at edge cases and unclear reasoning

iRent – Tent Installer
June 2024 – Present

- Installed and dismantled event tents in a team environment
- Followed safety requirements and client instructions
- Contributed to efficient logistics and time-sensitive setup

Popsport – Warehouse Worker
July 2022 – August 2022

- Prepared and packed customer orders
- Managed inventory handling and product organisation

Tartu Malev – General Worker
July 2019 – July 2020

- Performed maintenance and organisational tasks at public venues (Tartu Song Festival Grounds, Tartu Paper Museum)
- Contributed to upkeep, cleaning, and general site preparation
- Worked in a team environment and followed safety guidelines
